PROFILE SUMMARY

Junior Machine Learning Engineer with 2.5 years of industry experience in building and deploying machine learning models using Python. Experienced in data preprocessing, feature engineering, model training, evaluation, and API-based deployment. Skilled in Scikit-learn, FastAPI, Django, with working knowledge of LLMs and Retrieval-Augmented Generation (RAG) for document-based and knowledge-driven applications.

TECHNICAL SKILLS

- Programming: Python, SQL
- Data Analysis: Pandas, NumPy, Excel
- Machine Learning: Regression, Classification, Clustering, Feature Engineering, Model Evaluation
- Deep Learning: CNN, RNN (foundational)
- LLMs & GenAI: LLM fundamentals
- Deployment & APIs: FastAPI, Django, Django REST Framework
- Visualization: Power BI, Matplotlib, Seaborn
- Databases: Oracle Database
- Tools: Git, GitHub, ETL Concepts

PROFESSIONAL EXPERIENCE

Junior ML Engineer

NerdsHub E Pvt Ltd, Chennai

June 2024 – Present

- Built and trained ML models on structured datasets for prediction tasks.
- Performed data cleaning, EDA, and feature engineering.
- Implemented regression and tree-based models using Scikit-learn.
- Deployed models using FastAPI and integrated with frontend applications.
- Assisted in building LLM-based and retrieval-based prototypes for internal use cases.
- Supported end-to-end ML workflows and collaborated with senior engineers.

Oracle Technical Consultant Trainee

Focus R Technologies

Jul 2023 – Feb 2024

- Assisted in Oracle-based application development and data validation.
- Worked with SQL queries, procedures, and reports.
- Supported API integrations and bulk uploads using WebADI.

PROJECTS

1. Insurance Cost Prediction System

(Django + React + ML)

- Regression model for predicting insurance costs.
- Implemented preprocessing, feature selection, and model evaluation.
- Deployed via Django backend with React UI.

2. IPL Score Prediction

(Machine Learning + FastAPI)

- Linear Regression model for match score prediction.
- FastAPI-based inference endpoints tested using Postman.

3. ATM Cash Dispensing Optimization

(FastAPI + ML)

- Random Forest model for ATM cash optimization.
- Designed REST APIs for prediction services.

4. Document Question Answering System

(LLM + RAG – Mini Project)

- Built a document-based QA system using RAG architecture.
- Implemented text chunking, embeddings, and retrieval for contextual LLM responses.

EDUCATION

Bachelor of Computer Applications (BCA)

Cauvery College for Women | 2020

CERTIFICATIONS

- Data Science Program – Aug 2022 to Jan 2023
- Agentic AI Master Program – Nov 2025 – Present

DECLARATION

I hereby declare that the information furnished above is true to the best of my knowledge and belief.
